AulClear CFP

Blended Coagulant

AulClear CFP is a blend of inorganic and organic coagulants used for the capture and removal of metals in industrial wastewater. AulClear CFP is used in a broad range of liquid clarification processes in both municipal and industrial water and wastewater treatment applications for settling sludge, clarifying wastewater, and precipitating out heavy metals.

AulClear CFP is effective over a wide range of pH levels.

Directions: For your protection, always wear the proper safety attire when using AulClear CFP. For instructions specific to your application, contact your CITCO Water technical consultant.

Do not allow AulClear CFP to freeze. Always follow recommendations on the Safety Data Sheet.

Specifications

- Specific gravity: 1.33
- pH: 2.0 - 3.5
- Freezing point: 0°F
- Odor: negligible odor

Applications

- Heavy metals removal
- Municipal wastewater
- Industrial wastewater
- Sludge settling

Availability

AulClear CFP is available in 5-gallon pails, 55-gallon drums, 330-gallon totes, and bulk tanker quantities.
