GOLDEN BLEND

Floating Lift Station Degreaser

Golden Blend

Floating Lift Station Degreaser

Golden Blend is a biodegradable, non-hazardous citrus degreaser. Its super-concentrated formula is made from orange peel. Golden Blend works to remove grease on contact and is used in several degreasing situations encountered in wastewater treatment. Not only does it quickly remove grease, but it also deodorizes immediately, leaving a fresh citrus fragrance. Golden Blend has unique abilities to replace toxic chlorinated solvents and other solvents such as methyl ethyl ketone, xylene, and other petroleum solvents

Directions: Industrial application - use on any grease build-up in an industrial setting. No water is needed. Apply, let stand, agitate if necessary and wipe off. A pleasant citrus aroma will be all that remains. **Lift station (heavy grease)** - add at a rate of 8 parts per million. For heavy grease and build-up, it's best to be aggressive in the first two weeks and manually add Golden Blend to the lift station from a 5 gallon pail. Once all the grease is dissolved, the dosage levels can be changed back to a preventive dosage rate. **Lift station** - Add Golden Blend at a rate of 3 parts per million. It may be added in a continuous drip method or manual addition twice per week. **Wastewater plant** - add Golden Blend at a rate of 3 parts per million and use on a continuous drip method.

Specifications

- Appearance: gold liquid
- pH: not measured
- Flash point: > 155°F
- Specific gravity: 7.3 PPG

Applications

- Lift station degreaser
- Grease trap cleaner
- Floor and metal cleaner
- Graffiti & tar removal

Availability

Golden Blend is available in 5 gallon pails and 55 gallon drums.
