Render X

Render X

Concentrated Deodorant

Render X is a super-concentrated, non-hazardous deodorant designed to absorb odors associated with industrial applications and the wastewater industry. Unlike traditional concentrated deodorants, Render X goes above and beyond by absorbing odors and releasing an evergreen fragrance. Render X uses essential oil chemistry to absorb malodors such as mercaptans, hydrogen sulfide (H₂S) and ammonia. Render X has also been a proven solution at lift stations, aeration tanks, storage tanks, and lagoons.

Directions: Render X can be drip fed directly into the wastewater stream with CITCO Water's Tank Mount System or fogged using the BC Fogging System. Render X can be utilized with a spraying device to ensure even coverage and maximum odor neutralizing. When using Render X, it is suggested to wear safety glasses and rubber gloves.

For more specific application suggestions, contact your CITCO Water technical consultant. Take all precautions and follow recommendations on the Safety Data Sheet.

Specifications

- Appearance: clear liquid
- pH: 6.0 - 7.0
- Flash point: not measured
- Odor: fresh evergreen
- Specific gravity: 1.0036

Applications

- Lift station deodorant
- Sewer plants
- Rendering plants
- Industrial food processing

Availability

Render X is available in 1-gallon jugs, 5-gallon pails, 55-gallon drums and 330-gallon totes.
