JACKPOT

odor control

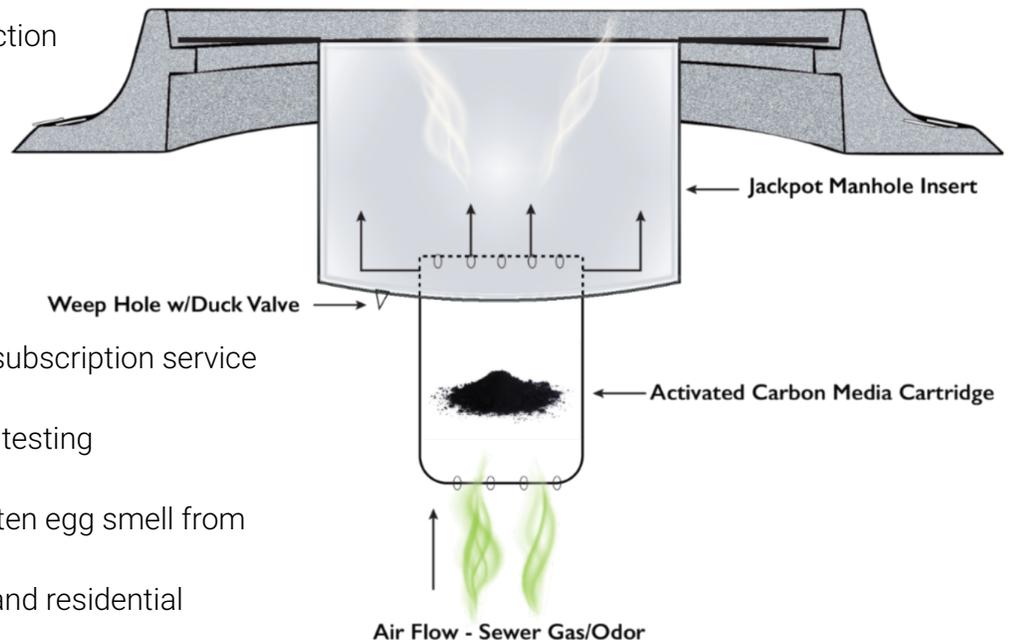

The Jackpot

The Jackpot is a stainless steel odor control device designed to remove odor in the form of hydrogen sulfide, mercaptans, and organic odors that emanate from sewer manholes.

Features and Benefits:

- Durable stainless steel construction
- Simple manhole installation
- Replaceable activated carbon media cartridge
- No power supply needed
- Easily maintained
- Customizable - fits most manholes
- Available with media cartridge subscription service (Jackpot MCS Advantage)
- Space for hydrogen sulfide gas testing
- Odors removed by adsorption
- Eliminates sewer odors and rotten egg smell from municipal manholes
- Prevents/resolves community and residential odor complaints
- Tested and proven to control odor in harsh environments
- Arrives installation ready
- Inserted directly into the sewer conveyance via the manhole
