STS BRAKE WASH
Safe-T-Solv | Parts Washing Fluid

Safe-T-Solv Brake Wash

Safe-T-Solv Brake Wash is a clear liquid that's specially designed to clean brake parts of oil, grease, dirt, and other soils. STS Brake Wash is used in the automotive industry for work on brakes, disc, and pad replacements. In these automotive applications, dust, grime, and dirt all build up in brake components. STS Brake Wash is highly effective in these cleaning applications, and because it's a solvent based cleaner, it dries quickly leaving no residue behind.

Directions: STS Brake Wash is stable under normal conditions and can be used in the toughest and dirtiest automotive repair shops. Consult your Aulick representative for specific instructions regarding the application of STS Brake Wash and wear safety glasses and rubber gloves when in use. Take all precautions and use recommendations on the Safety Data Sheet.
